

## How To Make: A GIANT CONKER SPIDER

To make a wonderful (and scary!) giant conker spider, you will need:

**1 polystyrene ball**

**8 pipe cleaners**

**8 googly eyes**

**Small piece of tan paper**

**Brown paint**

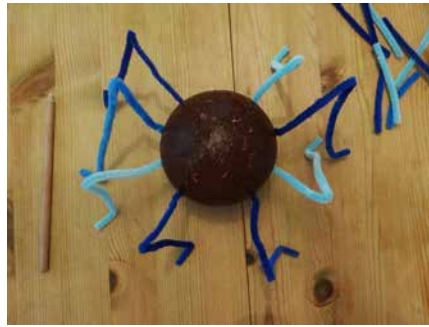

**Glue**

**Scissors**

## How To Make: A GIANT CONKER SPIDER

1. Start by painting your polystyrene ball brown.

2. Once your ball is dry, use a pencil to poke 8 holes in the ball. Stick a pipe cleaner in each of the holes and bend them in the middle so that they look like hairy spider legs. Use your imagination! Not all spiders have to have black legs. Use some colourful pipe cleaners to give your spider some personality.

3. Cut out a small round circle of tan paper.

4. Stick the round piece of tan paper to the top of your painted brown ball.

5. For the final touch, stick the 8 googly eyes to the top of your ball so that your spider can see in all directions!
