

How To Make: A POPPY BOUQUET

You will need:

Red cupcake cases – many!

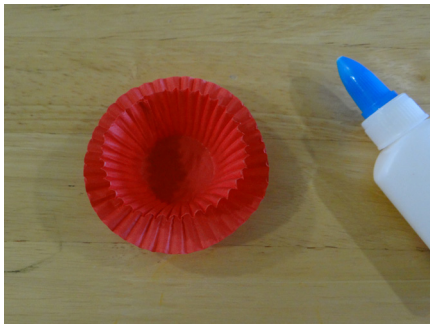

Black buttons – quite a few!

Green paper straws

PVA Glue – a small blob is best!

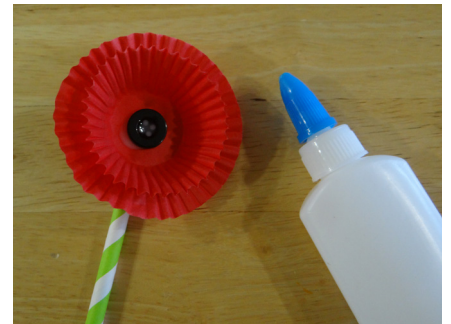

How To Make: A POPPY BOUQUET

STEP 1. Have two cupcake cases ready. In the bottom of one, place a small blob of PVA glue. Then, place the other cupcake case inside the one with the glue in it and firmly press down so that they stick together. Be sure to stick the inside case at a slightly different angle to create a layered petal effect.

STEP 2. Turn your stuck-together cupcake cases upside down. Apply a line of glue onto the bottom of the cupcake case. Then, firmly hold a green paper straw on the line of glue so that it sticks. Wait for it to dry before you move onto the final step!

STEP 3. Turn over your cupcake cases again now with the straw attached. Add a small blob of PVA glue into the centre of the inside cupcake. Firmly hold one of the black buttons on the glue until it sticks.

STEP 4. Repeat this process multiple times until you have a whole bouquet of poppies!
